givejedahand #Jason meeting #BCE CEO and #CAMH #CAMHFOUNDATION #Bigshot #letstalk #bellletstalk about #endstigma while #stigmatizing you worse than ever #Brain #Disease #Booster George Cope in the #streetsoftoronto for #streetphotography - reminds me of a song by #BuddyGuy:
The first time I met the blues
People, you know I was walkin', I was walkin' down through the #streetsoftoronto....
Blues, you know you done me, you done me all the harm that you could....
Blues, you know you ran me, ran me from street to street....
Yes, you should-a heard me beg ya, blues
Ah, blues, don't murder me

convenience.to Sick

givejedahand @convenience.to Yeah George Cope is from talking about #endstigma - #adnauseam. Though of course that's not what you mean so why don't you just go take another #badpicture of a #varietystore and spare me your #stupid #comments.

publishjosephng I get what you're trying to do here it's really cool. I appreciate it.

josephngpublishingfanpage Awesome inspiration. Bless you for reaching out to anyone who needs to hear your story. I AM certain that you have UPlifted the lives of many others.

givejedahand @josephngpublishingfanpage I don't know. I might have encouraged individuals by presenting through texts and images a different point of view from the monologue our institutions smother the internet with. I've sat in shops in Toronto listening to people discuss my stuff, so I guess you can say for a fact that I've helped create dialogue once or twice - perhaps without dialoguing myself - unless the images and texts I respond with amount to a dialogue? I'm not sure one can dialogue with a position or a point of view that one finds totally stupid and evil. It would be like dialoguing with Dr Goebbels - not worth it anyway! Maybe what we're talking about is monologue reversed. Who knows, who cares. Thanks for the response. At least it's better than a shadow ban.
